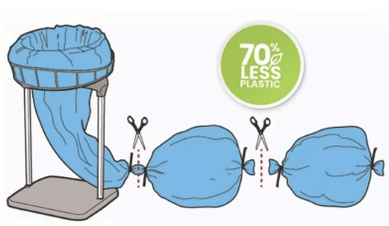
Smarter waste handling for logistics and manufacturing

Is any of your plastic going into expensive general waste?

Free collections of bagged plastic available* Conditions Apply

The Longopac® continuous bag system lets your team change a bag in under 30 seconds, fill every bag to 100%, and sort film and cardboard right where the waste is made. For reception, offices and canteens, Unisort® Climate stations bring the same system front of house.



Don't throw money away

Are you capturing all of your soft plastics in the warehouse?

Continuous liners: one long bag on a cassette. Seal, cut and the next bag is already in place, with no fetching new liners.

Longopac®
– endlessly clever

THE CHALLENGE

The waste problem on a busy site

Manufacturing and logistics operations create many kinds of waste, including cardboard, shrink wrap, plastic packaging, metals and offcuts. On a busy site, the way that waste is collected affects safety, cleanliness, labour costs and how much of it can be recycled.

A traditional liner: overhanging, part full and changed on a schedule.

Packaging waste at every dock and line

Pallet wrap, stretch film, strapping and cardboard pile up at receiving docks, pick-and-pack benches and the end of production lines. Once it is mixed together, it is much harder to recycle.

Dust and debris

Sweepings, offcuts and fine particles escape and spill when an open bag is tied off and lifted out of a bin, so the area around it needs cleaning again.

Time lost changing bins

Traditional liners are changed on a schedule, often half full. Each change means lifting, re-lining and cleaning up spills, which takes staff away from picking, packing and production.

Forklift traffic and floor space

Bins have to sit where people can reach them without blocking aisles, docks and forklift routes. Spare liners and bins take up storage space too.

Loose plastic film in a collection cage.

Don't throw money away

4 cages

of plastic collected per week could be costing you

over $5,000 a year

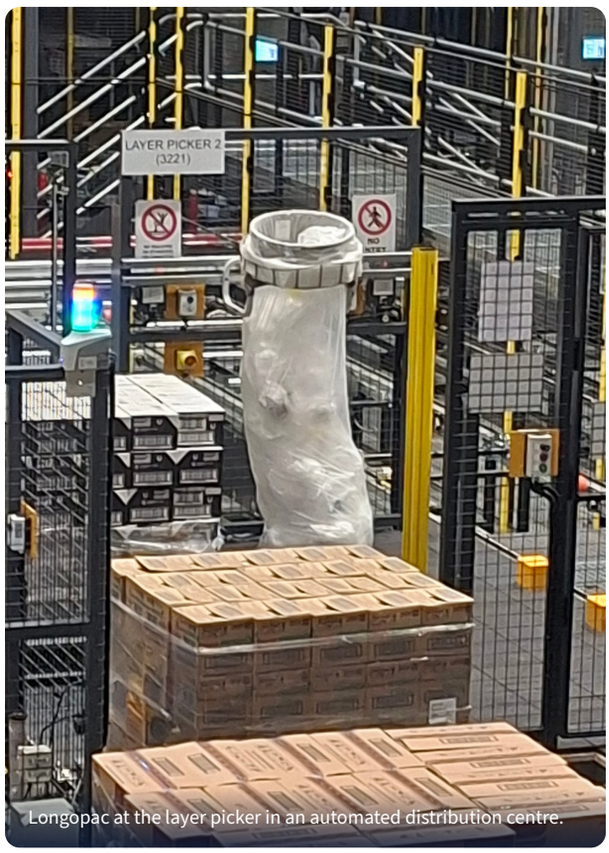
If it's going to landfill, it could be costing you

$20k per year

THE LONGOPAC SOLUTION

One continuous bag. Fewer problems.

Longopac is a cassette holding one long, continuous bag. You draw down as much bag as you need, seal it and cut it off. The next bag is already in place.



Longopac at the layer picker in an automated distribution centre.

A Longopac Classic Maxi beside a traditional bin on a warehouse floor.

Bag changes in under 30 seconds

Pull the bag down, tie it off, cut. A new bag is always in place, so there is no wasted time fetching new liners.

You choose the bag length

Make each bag as long as the waste needs. You decide when a bag is full, whatever the volume, so every bag leaves 100% full and none go out part full.

Sort at the source

Colour-coded cassettes and stand signs (A4 portrait or A5 landscape) make separate streams for film, cardboard and general waste.

Mobile, to the point of use

Classic and Dynamic stands are on wheels, and Dynamic stands have larger front wheels with brakes. Wall-hung holders and the slim Classic Midi fit along walls.

Compact cassettes, less storage

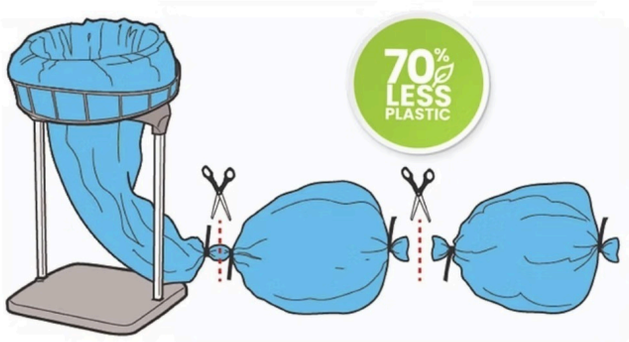
One Maxi Standard cassette holds 110 m of bag. Lower weight and compact packaging mean lower storage and transport costs than traditional bags.

Clean and hygienic

Bags are sealed and changed from the outside, with no hand contact with the waste. Spillage around the opening falls into the next bag, and germs and odours stay sealed in.

HOW IT WORKS

Three steps. Under 30 seconds.



1. **Pull down.** The cassette is sealed at one end with a cable tie. When the bag starts to fill, or you simply want to change it, pull it down to feed new material out of the cassette.
2. **Seal.** Close the bag with a cable tie at the top of the waste.
3. **Cut.** Attach another cable tie about 5 cm above the first one and cut between them. The next bag is ready.

Why teams prefer it

- 60–110 m long, sealed bin liner cassette
- Self-cleaning opening as each new bag is pulled through
- Adjustable tilting head for quicker, easier loading
- Germs and odours contained: every bag sealed from the bottom
- Easy to clean, with minimal surface area
- No contact with waste, and no liquid leakage
- 3-ply liner reduces bag splitting
- Wheels for better mobility

Cleaner and safer: bags are emptied from the side, not the top, with no hand contact with the waste.

ENVIRONMENT & COST

80%
lower CO_2 emissions
than traditional waste bags

70%
less plastic
than traditional waste bags

50%
recycled material
in all cassettes (except Food & Pharma)

100%
filling degree
every bag goes out full

Longopac is made from thin but strong 3-layer polyethylene. Paxxo has halved its film thickness since 1980 and makes every cassette in Malmö, Sweden, using fossil-free electricity. Paxxo AB is certified to ISO 9001 and ISO 14001. Savings come from less labour, no part-full bags, and lower storage and freight costs thanks to compact cassettes.

PRODUCT SELECTION

Stands, cassettes and accessories

Measurements are H × W × D in mm. Inlet is the opening size. Fzb = galvanised steel, Inox = stainless steel. Pedal versions of the Dynamic Mini (34670 / 34680) and Midi (34640 / 34630) are also available.

	Stand	Item no.	H × W × D (mm)	Inlet (mm)	Cassette	Best for
	**Classic Mini**	**31400**	850 × 430 × 400	Ø 305	Mini	Packing benches and workstations
	**Classic Midi**	**30500**	470 × 440 × 875†	Ø 335 × 335	Midi	Slim profile that fits along a wall
	**Classic Maxi**	**30070**	1055 × 650 × 595	Ø 425	Maxi	Docks, dispatch, general and film waste
	**Dynamic Mini**	**34650 Fzb · 34660 Inox**	955 × 395 × 405	230 × 230	Mini	Demanding areas; braked front wheels
	**Dynamic Midi**	**34600 Fzb · 34620 Inox**	955 × 495 × 555	320 × 280	Midi	Demanding areas; braked front wheels
	**Dynamic Maxi**	**34700 Fzb · 34710 Inox**	950 × 560 × 575	360 × 360	Maxi	Production lines and regular cleaning
	**Dynamic Maxi Pedal**	**34720 Fzb · 34730 Inox**	970 × 560 × 655	360 × 360	Maxi	Hands-free loading; lid with soft close
	**Classic Wall Maxi**	**30080**	460 × 580 × 660	Ø 425	Maxi	Where floor space is limited

† Dimensions for Classic Midi are as printed in the Paxxo Longopac Stand brochure (S.4304.10).

Choose your cassette (transparent item no. · length per cassette)

Size	Standard	Strong	ESD (Std / Strong)
Mini Ø 357 mm	10700 · 60 m	10720 · 45 m	10507 / 10647

Compacting soft plastics? Use Longopac Maxi Transparent Perforated cassettes

Ideal for bagging soft plastics that will be compacted. Six perforations every 25 cm let the air escape when the bag is compressed, for better results in compactors and balers. Available for Longopac Maxi only (Ø 570 mm).

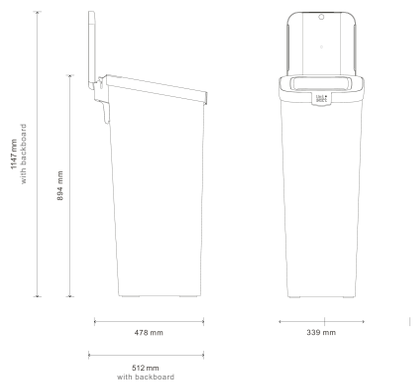
10160 Maxi Standard, perforated **10960** Maxi Ultra Lean, perforated Length per cassette: [to confirm]

RECEPTION · OFFICES · CANTEENS

Unisort® Climate: recycling with front-of-house appeal

Unisort Climate is a design-led, modular recycling station for the parts of your site that visitors and staff see: reception, offices, meeting rooms, canteens and breakout areas. Configure the bins to suit your space and waste streams, with clear signage that supports contamination-free sorting.

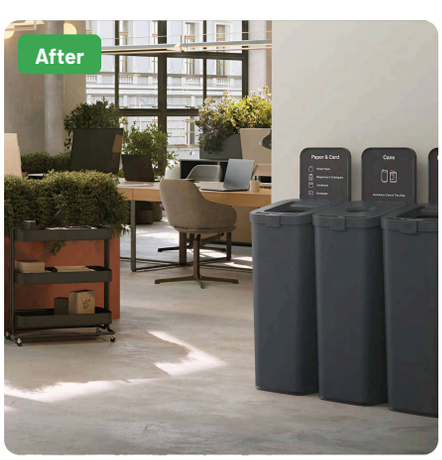
Made from 100% recycled post-consumer waste | 100% recyclable | 80 L capacity | Patented innovation | Made in the UK | 10-year guarantee



Height	**894 mm** (1147 mm with backboard)
Width	**339 mm**
Depth	**478 mm** (512 mm with backboard)
Capacity	**80 L**

Key features

- **Base unit:** 80 L capacity. Standard base, or an optional lockable security base.
- **Waste stream apertures:** 15 colour-coded, snap-fit, interchangeable options.
- **Handle:** Integrated ergonomic hand grip for easy handling.
- **Liner compatible:** Longopac colour-coded cassettes fit inside the matching Unisort bins.
- **Vented base & 3 L sump:** Unique air-flow design for quick, easy bag removal. The sump safely contains any liquid leaks from bags.



Out with overhanging liners

Standard bags that go out a third full waste plastic and create unnecessary CO_2. By design they are wasteful: liners overhang the bin and are emptied on a schedule, whatever the fill level. With a Longopac liner in Unisort, you only cut the bag length you need, so every bag is 100% full.

UNISORT CLIMATE OPTIONS

Configure your recycling station

First decide which waste streams you need and how many collection points your site has. Then choose, for each station: **1** a base, **2** apertures, **3** signage, **4** liners and **5** accessories.

1 · Base

Standard Base: 80 L, made from 100% recycled materials	**UC1000**
Lockable Security Base: adds a lid lock and X Slot aperture for confidential paperwork	**UC1010**
Extra security layer: metal plate for the X Slot aperture	**UC8125**

2 · Apertures: 15 snap-fit options

Open · General waste
UC8130 + colour: G grey · LG lime green · R red · OR orange · B blue · BL black

Round · Bottles, cans, cups
UC8110 + colour: G grey · T teal · R red · OR orange · LGY light grey

X Slot · Paper recycling
UC8120B blue · UC8120G grey

Lift-up lid · Food waste
Soft close + antimicrobial: UC8400DG dark green · UC8400G grey

3 · Signage for every stream

The backboard takes removable slide-fit graphic panels made from recycled PP, in 3 design options. Adhesive cover decals come in 2 design options. Customised versions are available on request.

General Waste · Non-Recyclables · Mixed Recycling · Dry Mixed Recycling · Food Waste · Plastics · Paper · Paper & Card · Glass · Cups · Cans · Batteries · Confidential Paper · Plastics, Cartons & Metals

4 · Longopac Mini liners, colour-matched

- **Red** general waste
- **Black** general waste
- **Yellow** mixed recycling
- **Clear** soft plastics
- **Green** food scraps
- **Blue** paper or glass

Cable-tie twice and cut. Each bag is only as long as the waste needs.

5 · Accessories

Safety cutter (integrated)	**UC8300**
Liner accessories holder	**UC8700**
Connector (links stations)	**UC8800**
Retainer bungee (stops liner slipping)	**UAB801**
Capacity limiter (24 L, food waste)	**UC8710**
Snap-fit blank backboard	**UC8200**

Easi Recycling stocks bins set up for general waste, plastics and cans, food waste, glass, paper and confidential paper (lockable). Rental options are available.

EXHIBITION OFFER

Rent a Longopac stand from $2/week (Mini) or $3/week (Maxi)

[Offer terms, GST and end date to be confirmed]
