# Standard bags that are 1/3 full wastes plastic & creates unnecessary CO2

By design, standard bags are wasteful due to overhang on the bins and scheduled emptying regardless of the fill level.

# Unisort®Liner System

reduces plastic usage and CO2 attributed to waste bags by 80%

Only cut the bag length required to hold the waste disposed of, instead of removing a whole bag.

A cleaner, quicker and greener way to reduce CO2.

1 Remove Inner Liner Holder

2 Cable Tie Twice & Cut. Simply pull new liner through

3 Always 100% full and no wasted plastic

# Optional Accessories

**M** Connector

Connect your stations for secure and space saving positioning. Keep all waste streams to hand in one place.

UC8800

**N** Retainer Bungee

Secure your liner in position to retain alignment and prevent slipping down inside the bin.
